Software Engineer

## EDUCATION

**University of California,  
Riverside**

Riverside, CA — *Full  
Stack Web Development  
Program*

February 2021

# Armando Galindo

## PROJECTS

**Rediscover** - [GitHub Repo](#) | [Live Link](#)

Rediscover is a Full Stack React application, developed by a team of five. Created for users to share images and locations of their adventures. Sorted by different categories: Murals, Historical Locations, Haunted Houses, Film Locations, Nature, as well as a miscellaneous category. Users would be able to publish an image of their mural with a location. Rediscover your own adventure with direct navigational capabilities.

**Tools and Languages used:** MongoDB, Express.js, React, Nodemon, Bootstrap, Google Login, Material UI.

**The Long Cut** - [GitHub Repo](#) | [Live Link](#)

Led a team of four in developing a full web application that provides long routes for car cruising. Application has been made, to provide maps, via Google Maps API. Besides Long routes through scenic environments, it also provides a range of lesser-known California hiking trails. Maps API provides an array of navigational information, for your driving or hiking needs.

**Tools and Languages used:** HTML-5, CSS, Vanilla JavaScript, Google Maps Api, Giphy Api.

**Artisan Otomi** - [GitHub Repo](#) | [Live Link](#) | [Shopify Repo](#) | [Shopify Link](#)

E-commerce Shop displaying Artisan Handcrafted Otomi Culture. Developed with Material UI, Commerce.js, Stripe, and Redux. Also engineered a distinct application with Shopify development tools.

BOTH CREATED FOR DEMO PURPOSES ONLY.
