University of California, Riverside - *Certificate Full Stack Web Development*

July 2020 - January 2021

PROJECTS

Rediscover App - [Github Repo](#) | [Live Link](#)   **2021**

Rediscover is a Full Stack React application, developed by a team of five. Created for users to Rediscover the world around us. Rediscover allows users to share images and locations of their adventures. Sorted by categories; for example Murals, a user would be able to publish an image of their mural with a location tag for other users to visit the mural location. Other categories include, historical locations as well as haunted houses.

Tools Used to construct Website: Mongoose, Express, React, Nodemon, Bootstrap, Google Login, Material Ul..

The Long Cut - [Github Repo](#) | [Live Link](#)   **2020**

Led a team of four, in developing a full web application that provides Long routes for car cruising. Application has been made, to provide maps, via Google Maps API. Besides Long routes through scenic environments, it also provides a range of lesser known California hiking trails. Maps API, provides an array of useful information, for your driving or hiking needs. Responsibilities included

Tools Used to construct Website: HTML-5, CSS, Vanilla JavaScript, GoogleMaps Api, Giphy Api.
