University of California, Riverside

Riverside, CA — *Full Stack Web Development Program*

February 2021

PROJECTS

Rediscover – [GitHub Repo](#) | [Live Link](#)   2021

Rediscover is a Full Stack React application, developed by a team of five. Created for users to share images, locations of their adventures. Sorted by different categories: Murals, Historical Locations, Haunted Houses, Film Locations, Nature, as well as a miscellaneous category . Users would be able to publish an image of their mural with a location. Rediscover your own adventure with direct navigational capabilities.

Tools and Languages used: MongooseDB, Express.js, React, Nodemon, Bootstrap, Google Login, Material UI.

The Long Cut – [GitHub Repo](#) | [Live Link](#)   2020

Led a team of four, in developing a full web application that provides Long routes for car cruising. Application has been made, to provide maps, via Google Maps API. Besides Long routes through scenic environments, it also provides a range of lesser known California hiking trails. Maps API, provides an array of navigational information, for your driving or hiking needs.

Tools and Languages used: HTML-5, CSS, Vanilla JavaScript, GoogleMaps Api, Giphy Api.

Artisan Otomi – [GitHub Repo](#) | Live Link | [Shopify Repo](#)   2023

E-commerce Shop displaying Artisan Handcrafted Otomi Culture. Developed with Material UI, Commerce.js, Stripe, and Redux. Also engineered a distinct Application with Shopify Development tools.

Both created only for demo purposes.
